> 2 MR. QUINN: Good morning, Your Honor. Michael Quinn

3 for the government. We thought it would aid the Court.

Plaintiffs had requested this. We put together another copy of

09:33:49 5 the administrative record with the legends of the indexing that

6 the defendants had indicated in their pretrial statement filing,

7 and have burned that to disk. The disk also contains an index.

8 so if you click on the link beside the document, it will take

you specifically to that document in the administrative record.

09:34:06 10 THE COURT: Good.

> MR. QUINN: We've got two copies for the Court, for 11

12 vour reference.

13 THE COURT: Hand them to Al. Thank you very much.

14 Mr. Harper, good morning.

15 MR. HARPER: Good morning, Your Honor. We just wanted 09:34:19

16 to say that we have finalized the glossary, and have it to

17 provide to you. So should I just hand up a couple of copies?

18 THE COURT: Yes, yes, and a copy for everybody in the

19 audience.

20 MR. HARPER: Good. Thank you, Your Honor. 09:34:42

> 21 THE COURT: Good grief. Do you have an index to this,

22 too?

23 All right. Ms. Herman?

As I mentioned, we're mapping the transfers and reversals within those accounts, not necessarily every transaction within the account.  Q. Okay. So if there's money in the Special Deposit Accounts over the years that belongs to individual Indians, you're not charged with making sure that goes in to a specific individual Indian account?  A. I think we're discussing several different issues here. In the context of the accounting project, yes, we make sure that the funds get to the appropriate account.  In the account of the transaction mapping, we're looking at flows of money.  And then there's a separate project that OHTA has that's distributing remaining balances in Special Deposit Accounts. So I think we have three different topics that we're discussing.  Q. Maybe I'm discussing a fourth possibility. Is anybody tasked with looking at all the money that goes in to the SDAs, determining which belongs to individual Indians, and then making sure that goes in to the IRMS or TFAS database?	2 3 4 10:20:57 5 6 7 8 9 10:21:12 10 11 12 13 14 10:21:28 15 16 17 18 19 10:21:41 20 21 22	A. I don't believe that that's been a specific task. But as I mentioned through the transaction mapping that we're doing, you can compute how much money has been transferred out to which sources.  Q. You can compute what was actually posted to an IRMS account?  A. You can compute what was transferred from the Special Deposit Account. The Special Deposit Account exists within the IRMS system.  Q. But that doesn't mean that all the individual money, Indian money in the Special Deposit Account, made it into IRMS, does it?  MR. QUINN: Objection, Your Honor. Vague. The Special Deposit Accounts aren't on IRMS. The witness just testified to that. He keeps asking questions suggesting that the Special Deposit Accounts somehow are outside the IRMS system.  MR. SMITH: I'll rephrase the question.  THE COURT: Now that that's been clarified, can the witness answer the question?  THE WITNESS: I don't recall the question.  MR. SMITH: Sure.  THE COURT: He wants to know whether you can verify that everything in the SDAs were in fact posted to IIM accounts.

16	Q. And roughly 20 percent had no balance file information?	16	beginning balance was consistent with the balance file?
17	A. Yes, that's what's in the middle section of this chart.	17	A. These, we had to compute a beginning balance using a hard
18	Q. That's the 92 plus the 48?	18	copy balance file.
19	A. That's correct.	19	Q. Okay. I understand.
11:25:45 <b>20</b>	MR. SMITH: If we could look at Exhibit 152-271. Can	11:28:35 <b>20</b>	And then the next column is the ones where you had one
21	we make that a little bit bigger?	21	or more differences, and you found 55,436 accounts where you

11:29:39 10	Q. I'm sorry, 55,436. Okay, thank you.	11:32:30 10	Q. And you do not know how many errors are in the 48,694, which

It says, "As of the date of this report, 2,597,306 transactions, or 2.7 percent of the total transactions analyzed, remain in the population for review."  Okay. This was a change from roughly 700,000 before?  A. I don't recall what it said previously. This is the number that was reported in all of the supporting schedules.  Q. So this is the correct number as to the number of transactions that remain?  A. That's correct.  Q. And you talked about in the population for review. Is that the post-1994 period?  A. No. As I mentioned, we review all transactions in the electronic data.  Q. So the population here means something different than post-1994?  A. Yes, it does.  Q. If you could look at Defendant's Exhibit 146, the one you looked at yesterday. 146-1, do you remember this as a grazing permit?	2 3 4 12:19:36 5 6 7 8 9 12:19:45 10 11 12 13 14 12:19:59 15 16 17 18 19 12:20:13 20 21 22	on page two. BY MR. SMITH:  Q. And does that reflect the fractionalization information you obtained from LRIS?  A. That's correct. Q. And you're relying on what BIA told you about that information?  A. That's correct. Q. And what this came down to was trying to track ultimately what this gentleman received, which was \$0.58. Is that correct?  A. I'm sorry? Q. Ultimately, this particular gentleman on this transaction received \$0.58?  A. That's correct. Q. And you tried to track that to make sure he got it?  A. That he should have received \$0.58 and not another dollar amount. Q. Okay. And this was a lease, as we noted, that went through 2002. Is that correct?  A. Yes, it did.  MR. SMITH: If we can look at Defendant's Exhibit 115?
